jasonwindows.com.au

What Gives Jason Windows Security Screens the Clear Difference

If you have Jason windows and doors in your home, then the Jason's range of security screens are the only choice.

Our security screen range has been specifically designed to fit the Jason range seamlessly and is available in Premium Marine Grade 316 Stainless Steel Mesh or Marine Grade Perforated Aluminium. The range includes:

- Hinged doors including entry doors
- Sliding doors
- Stacking doors
- Sliding windows
- Awning windows
- Double hung windows

No more ill fitting aftermarket security screens that require modification—Your Jason windows and doors will look great with our made-to-measure Jason security screens.

Strength & Assurance

316 Marine Grade Stainless Steel Woven Mesh

Our premium security screens are made from 316 marine grade stainless steel woven mesh for ultimate security. The woven mesh is retained in the frame using PVC co-extrusion that is resistant to UV offering the highest level of corrosion resistance available.

Perforated Marine Grade Aluminium

Our perforated range of security screens are constructed from a single sheet of tempered marine grade perforated aluminium and retained in the frame using a unique bonding process for extra strength.

Features and Benefits of Choosing Jason Security Screens

At Jason Windows, we're just as invested in your home as you are. After hearing from customers with Jason windows & doors who have been disappointed with alternative products, we designed and crafted a range of security screen windows and doors to fully integrate into the Jason suite of products in terms of security and strength while continuing to deliver a stylish look for your home.

Incorporating the strength, quality, and design features Jason Windows is renowned for, our security screen range will fully integrate with your existing Jason frames.

FEATURES AND BENEFITS

UNIQUE TO JASON SECURITY SCREENS

There's a clear difference with Jason Windows security screens. Above the standard security screen features offered by most suppliers, Jason Security Screens have a range of additional features unique to Jason Windows.

✔ No Modification Required

Not all window and door frames are the same. Other suppliers of security screens often have to modify their security screen products at installation in an attempt to make them fit into the Jason frames. This can leave you with unsightly, ill fitted security screens.

The Jason Windows range of security screens are designed to specifically suit Jason door and window frames seamlessly without the need for modification.

✔ Unique Fitting System

The Jason range of window security screens can be safely and easily installed from inside your home, limiting potential damage to your gardens. For two storey homes, you can avoid the cost and hassle of scaffolding which is required by other security screen providers to install the screens from the outside.

We don't need to access your windows via your garden beds

✔ Unique Drainage System

Some security screens can block your windows drainage system allowing the water to build up and overflow into your home. The Jason's range of security screens have a unique water drainage system allowing the water to drain outside. The system also allows for sand and dust to be easily washed away with water.

✔ Stylish & Sleek

Ever seen security screens that have ugly screws and rivets visible from the outside of the home? Jason Windows security products have been designed to ensure the style of your home won't be compromised. Our fixings are concealed and not visible on the outer screen, offering a sleek look to blend in with the style of your home.

✔ Hassle Free Quoting

With Jason Windows products already in your home, it's likely we will have a copy of your house plans from when your home was originally built. This enables our Security Screen Sales Team to provide a quote without inconveniencing you with a home visit. Of course, if you would prefer to have our sales team visit your home so we can go through the product and installation process with you in detail, then contact us today to lock in a suitable day and time.

Convenient quotes your way - online or in person

FEATURES AND BENEFITS

STANDARD WITH JASON SECURITY SCREENS

Jason 316 Stainless Steel Mesh gives you a 156° viewing angle

Jason 316 Stainless Steel Mesh is ideal for keeping your pets on the safe side

✓ Clear Views

Looking for unrestricted views? Then our 316 marine grade stainless steel security screens are perfect for areas of your home where you want a view of your garden or keep an eye on the children playing outside.

For areas of the home where clear views are not required, our Perforated Marine Grade Aluminium security screens provide a more restricted view.

The Triple Lock, One Flick System gives you extra protection

✓ Triple Lock, One Flick System

All Jason security screen doors have a triple lock, one flick system. With one flick three locking points are activated on the door giving you extra protection from the door being wrenched at the top or bottom by an intruder. All hinged doors have three fixed pin hinges that cannot be removed.

✓ Pet Friendly

Pets love to paw their way through flyscreens which are designed to keep insects out, not animals. Upgrading to security screens will ensure your pets and children are kept on the safe side while saving you the ongoing job of re-meshing your flyscreens.

✓ BAL Rated

The Australian Standards AS3959 have classified different bushfire intensity levels that a home, depending on location, may be exposed to in the event of a bushfire. These are called Bushfire Attack Levels (BAL). Jason Windows 316 Stainless Steel Security Screens meet bushfire ratings up to and including BAL40, and our Perforated Aluminium Security Screens meet bush fire ratings up to and including BAL29.

✓ Multi-Storey Window Safety

In accordance with the National Construction Code (NCC), some upper-level windows require opening restrictors to prevent the window being opened more than 125mm. This was introduced in 2013 to help prevent the growing number of children falling from multi-storey homes.

Your builder or a Jason Windows product specialist can advise if restrictors are required on your upper level windows. Restrictors can be avoided if security screens are installed.

All Jason security screens meet the building code requirements for upper storeys allowing full operation of your windows and the flow of fresh air through your home whilst keeping your kids on the safe side.

✔ Australian Standards & Warranty

All Jason Security Screens are rigorously tested to ensure they meet or exceed relevant Australian and Industry Standards including:

- Security tested to AS5039-2008 / AS5041-2003
 - Dynamic Impact Test - Determines the resistance of the security product to a specified level of attack in the form of impact energy. This test simulates an attacker kicking the screen.
 - Jemmy Test - Determines the resistance of the security product to a specified level of attack with a lever force.
 - Pull Test - Determines the resistance of the security product to a specified level of attack in the form of a pulling force.
 - Knife Shear Test - Determines the resistance of the security mesh infill to a specified level of attack with a heavy duty trimming knife.
- Sliding Door Lock tested to AS4145.2-2008
- Fire Attenuation tested to AS1530.4-2005(App B7)
- Bushfire tested to AS1530.8.1-2007
- Salt Spray Testing:
 - Our perforated aluminium security screens have undergone a 3,000 hour acetic acid salt spray and a 3,000 hour neutral salt spray test regime.
 - Our 316 marine grade stainless steel security screens exceed the exposure milestone of 8,000 hours of salt spray and are ideal for seaside environments.

Jason Windows are a proud member of the National Security Screen Association

The National Security Screen Association (NSSA) is the peak national industry association representing all security screen manufacturers, installers and suppliers.

As a member of the NSSA, Jason Windows is audited every year to ensure our security screens are being manufactured to meet the Australian Standards and regulations and that the design performance has been verified by a National Association of Testing Authority (NATA) accredited test laboratory in accordance with AS5041.

NSSA members have to comply to a strict code of conduct, manufacture compliant security screen products, participate in industry-specific training and install to the highest standards.

To ensure your new security screens comply with the relevant Australian Standards, look for the NSSA Compliance Label or ask for a compliance certificate.

Our team of trusted installers all hold WA Police Security Licences.

Backed by a 10-year structural warranty, our experienced, friendly team of service technicians can service ALL your Jason Windows products for the life of your home.

✔ Security Screens to Suit Your Life Style

Your lifestyle and priorities can help to determine the best security screen product for your situation. Use this handy table as a guide to help get you started:

PRIORITY & LIFESTYLE	316 STAINLESS STEEL	PERFORATED ALUMINIUM
I live close to the ocean and have corrosion concerns	✔	
Security is my main priority	✔	✔
Keeping my pets on the safe side is my main goal		✔
I'm on a budget		✔
I want to be able to see the kids playing in the garden	✔	
I live in a BAL rated fire zone	✔	✔
I don't want to see screws and rivets on the outside of my screens	✔	✔

Not sure if you have Jason Windows?

If you have Jason windows and doors on your home we can retrieve your house measurements from our database - saving you the inconvenience of an in-home measure and quote.

Here's a couple of easy ways to check:

1. Look for a Jason Windows logo on your window handles or mullion blocks
2. Check to see if you have our Lever Lock handles on your sliding doors

These are just two ways to check and they don't apply to all homes. If you're still unsure, give us a call and we can check for you!

Can you see a Jason Windows logo on your window handle, or other parts of the frame?

Some homes will have our distinctive looking Lever Lock handles on the sliding doors

Colours

Jason Security Screens are available in seven popular colours from our standard colour range. Custom colours are also available however extended lead times and additional charges apply.

Please refer to our Colour Guide which you can find in the Brochures section on our website or from your builder.

Better still come and visit us at one of our showrooms to select your perfect colour.

Please note that it is always recommended to choose your colour from an actual sample as variations can occur between digital monitors and printers.

Interest-Free Options

Jason Windows have partnered with Zip and can now offer interest-free options on our 316 Marine Grade Stainless Steel Security and Perforated Marine Grade Aluminium Security Screens. Call our security screen sales team today for an interest-free security screen quote. Terms & conditions apply.
